

Introducing a multifunctional marvel.

We understand that those who suffer from hearing loss need one defining function from a hearing device: clear, rich sound. But with today's new technologies, what about functions that make your day-to-day life easier, such as rechargeable batteries, hearing apps on your phone, and connecting to your household devices? You need hearing aids that can keep up with today's technology landscape.

Introducing **Phonak Audéo™ Marvel**, a first-class hearing device that gives you crisp hearing and so much more.

Through years of research and development, Phonak Audéo Marvel has been built to provide you with:

- **Clearer, richer sound than ever before**, with updated directional microphones and AutoSense OS™ 3.0
- **Connectivity to smart devices**, including iOS and Android phones
- **AirStream technology**, allowing you to stream directly from any TV and stereo system. Use your hearing aids like headphones to enjoy your favorite TV programs, music and movies
- **Rechargeable batteries**, removing the hassle of changing batteries
- **myPhonak app** allows you to keep track of your hearing experience and gives you the confidence and peace of mind that your personal hearing needs are addressed

With all these added features, it's so much more than a hearing aid; it's a **multifunctional marvel**.

We invite you to test out Phonak Audéo Marvel today and experience **love at first sound**. Give us a call today and schedule your appointment to be one of the first to hear this revolutionary hearing technology today.

Wishing you and your family a happy and healthy holiday season.
